What is Cultural Capital?

Cultural capital is the accumulation of knowledge, behaviours, and skills that a student can draw upon and which demonstrates their **cultural** awareness, knowledge and competence; it is one of the key ingredients a student will draw upon to be successful in society, their career and the world of work. Cultural capital promotes social mobility and success in our stratified society.

Cultural capital gives a student power. It helps them achieve goals, become successful, and rise up the social ladder without necessarily having wealth or financial **capital**.

Cultural capital is having assets that give students the desire to aspire and achieve social mobility whatever their starting point.
